

Dell OpenManage™ Remote Service Card and Dell™ Remote Access Card III — Information Update

This document is for Dell PowerEdge™ 7150 systems only and updates information about the following topics for your Dell OpenManage Remote Service Card (DRSC) and your Dell Remote Access Card III (DRAC III):

- A new user interface
- Important documentation information

New User Interface

If you have a DRSC, you can take advantage of a new user interface by upgrading your firmware from the Dell | Support website at support.dell.com. For information about installing firmware, see the *User's Guide* for your card.

 **NOTE:** The user interface for your DRSC has changed, but the features and functionality remain the same. The Dell OpenManage Remote Service Card has been renamed Dell Remote Access Card III. With this name change, remote management solutions for 64-bit and 32-bit platforms have been combined into one solution.

Important Documentation Information

It is important that you use the appropriate remote access card documentation for your system. Use the following guidelines when using your documentation:

- If you have a Dell PowerEdge 7150 and a DRSC, do not use the *Dell OpenManage Remote Service Card User's Guide* located on your documentation CD. Use the *Dell OpenManage Remote Service Card User's Guide* located on the Dell | Support website at support.dell.com.
-  **NOTE:** Always use the *Server Management* CD that comes with PowerEdge 7150 systems to install the managed server software on PowerEdge 7150 systems.
- If you have a Dell PowerEdge 7150 and a DRAC III, use the *Dell Remote Access Card III (DRAC III) User's Guide*, which is located on the Dell | Support website at support.dell.com and on your documentation CD.
